Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joshua D. Isenberg on August 17, 2005. The application has been amended as follows:

- Please amend the first paragraph of the specification, starting on line 5, to read:
This application is related to commonly assigned, co-pending application serial no. 10/719,040, filed 21 November 2003, the entire disclosures of which are incorporated herein by reference. This application is also related to commonly assigned U.S. Patent Application 10/443,456, the entire disclosures of which are incorporated herein by reference.

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Prior art does not teach or suggest, in combination with the other claimed limitations, a method of infiltrating organic material into spaces in one or more nanostructures by exposing the organic material to a solvent vapor. Haggemueller et al. (Chemical Physics Letters 330, 2000) teaches a method of dispersing carbon

nanotubes in an organic material in the presence of a solvent, but does not expressly teach that the organic material is infiltrated into spaces in one or more nanostructures by exposure to the solvent vapor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
